Bayer Campus - A café private rooms, near Onyx	Washington University Campus

### ABOUT MISSOURI REGIONAL SCIENCE BOWL

The Missouri Regional Science Bowl is a two-day event that involves an academic competition for middle school students across Missouri as well as science-related enrichment activities (STEM). The champion of the Missouri competition will go on to participate in the National Science Bowl (sponsored by the Dept. of Energy). Read more at the US Department of Energy site: <http://science.energy.gov/wdts/nsb>

## Volunteer & Be Inspired by the Next Generation!!

Volunteers (**fully vaccinated or negative COVID test**) are needed to support scrimmage and competition activities. **Food, fun, and a free T-shirt are included for your time.**

Bayer is a corporate sponsor of this event, and we need about **50 volunteers** for the scrimmage and **100** for the competition.

We have 5 types of roles to fill for in person events: moderator, science judge, timer, scorekeeper, and runner. (**Roles are subject to change depending on format of main event – in person or virtual**)

- **Moderators** – read the questions for students to answer (science background required)
- **Science Judge** – support the moderator & provide guidance for challenges
- **Timekeepers** – track time limits set for students to answer questions asked by the moderator
- **Scorekeepers** – keep score during the competition
- **Runners** – will circulate question sheets from room to room each round

**Training will be held the same week of each event.**

**Use the QR Code to access the volunteer section of our website, sign up, browse our FAQ guide & share with family/friends (15+ years and older are welcome) <https://www.moscibo.org/volunteers>**
